PROFESSIONAL PROFILE

Frontend-focused Software Engineer and current Lead Software Engineer at BlueSoft, specializing in React, Next.js, and TypeScript with end-to-end ownership from architecture to production. I design scalable, maintainable frontends for real-time, AI-powered products, with a growing backend skill set in Go. Comfortable owning technical direction, setting engineering standards, and shipping reliably under changing requirements. Based in Pakistan (UTC+5), flexible to overlap with US and EU hours; open to remote roles internationally as well as on-site roles in Pakistan.

PROFESSIONAL EXPERIENCE

Lead Software Engineer — BlueSoft

Jul 2025 – Present

- Own the frontend architecture and technical direction of Tradevo, an AI-powered real-time crypto trading-journal platform (React, Next.js) in public beta with live users.
- Architected a unified, cookie-persisted filtering system shared across the Analytics and Journal pages — a single source of truth that replaced duplicated logic across the app.
- Built core product surfaces: Analytics (live per-coin charts, watchlist, KPI cards, ECharts), Markets, Journal (open/closed positions with list, grid, and detailed views), onboarding, and auth/profile/settings.
- Integrated real-time Binance market data through a backend API (client → backend → Binance), keeping data access and rate-limits server-side.
- Cut page load times ~40–60% via caching and hover-based prefetching for near-instant interactions.
- Rebuilt the Tradevo marketing site pixel-perfect in Next.js; own and continuously evolve the BlueSoft company website.
- Own frontend coding standards, contribution guidelines, and code-review practices; stabilized CI/CD pipelines with Dockerization.

Software Engineer — BlueSoft

Jan 2025 – Jul 2025

- Delivered and maintained production web apps (React, Next.js, TypeScript) for in-house and client projects, including OfficeSolver.
- Migrated the BlueSoft website from legacy React to Next.js and shipped Ghost CMS as the content backend, improving performance and SEO.
- Implemented secure OTP authentication (Firebase, Brevo) and large-scale state management (Redux, Zustand).
- Partnered with designers, product, and stakeholders to ship responsive, mobile-first interfaces.

React Native Developer, Internship — BlueSoft

Nov 2024 – Jan 2025

- Learned and applied React Native, Expo, and TypeScript in a real-world development environment.
- Built cross-platform mobile apps focused on UI/UX and modular, reusable components.
- Took part in Agile cycles and code reviews.

KEY PROJECTS

Tradevo *Lead Software Engineer, BlueSoft*

tradevo.ai

AI-powered real-time crypto trading-journal platform in public beta. Led frontend architecture; built Analytics, Markets, and Journal, a unified cross-page filtering system, and live Binance-backed charts; cut load times ~40–60%.

React, Next.js, TypeScript, ECharts, TradingView, Firebase

OfficeSolver *BlueSoft*

officesolver.com

Business-management platform covering projects, clients, payroll, and workflows; built and maintained in production with continuous post-launch updates.

React, Next.js, TypeScript

BlueSoft Website *BlueSoft*

bluesoft.ai

Migrated the company website from legacy React to Next.js with Ghost CMS; own and continuously evolve it for performance and SEO.

Next.js, Ghost CMS

Aiva *Final-Year Project (in development)*

AI voice receptionist that automates appointment booking and handles queries 24/7 through a real-time voice pipeline.

Next.js, LiveKit Agents, WhisperFlow (STT), ElevenLabs (TTS), Llama 70B (Groq)

Webhook Relay *Personal Project*

github.com/Zaidi8/webhook-relay

Go backend service: HMAC-verified webhook ingestion, an async delivery worker with exponential backoff and dead-lettering, and a real-time WebSocket relay hub; graceful shutdown, layered architecture, and tests.

Go, Echo, PostgreSQL (pgx), WebSockets, Docker

EDUCATION

University of the Punjab — BS, Information Technology (Computer Science)

2022 – 2026

SKILLS

Languages: TypeScript, JavaScript, Go, Python, C++, C, Kotlin

Frontend: React, Next.js, TailwindCSS, Redux, Zustand, shadcn/ui, ECharts, Responsive Design, Web Performance, SEO

Backend & Infrastructure: Go (Echo, pgx), PostgreSQL, REST APIs, WebSockets, Docker, CI/CD, Firebase, Ghost CMS, Vercel

AI: AI Integration, LLMs, Voice AI (LiveKit, ElevenLabs), Prompt Engineering, Claude Code

Testing & Tools: Playwright (E2E), ESLint, Prettier, Git/GitHub, Figma, Agile

Spoken languages: English (professional working proficiency), Urdu (native)

CERTIFICATIONS

Claude Code in Action · Artificial Intelligence for Beginners (HP LIFE)
